

I'm writing to say I am soooo in favor of the State of New Jersey's No-Call list. The telemarketing calls in our area had gotten so bad, that we and some others I've spoken to wouldn't even answer their phones until you talked on the machine and they knew you weren't trying to sell them something. Others even purchased and pay monthly for caller ID on their lines, so they don't get stuck in one of these calls. It has been such a nice feeling, knowing that when your phone rings, the person on the other end is calling to talk to you! If so many people have signed up this list, it must show you something.
